For more detailed information on all ICASTEC program, please visit www.icastec.com.sg

English Language

Mother Tongue Language (Mandarin)

This subject aims to enable students to communicate effectively and have a deeper understanding in mandarin. At the end of the course, students should be able to listen, speak, read and write in mandarin.

Elementary Mathematics

This subject is intended to provide students with the mathematical knowledge and skills. It aims to develop the necessary mathematical concepts and skills for continuous learning in mathematics and related disciplines, and for the applications to the real world. By developing students' mathematical thinking and problems solving skills, they are expected to apply these skills to solve problems with logical reasoning and judgement.

Additional Mathematics

The O Level Additional Mathematics syllabus assumes knowledge of O Level Mathematics. The aim of this course is to acquire the necessary mathematical concepts and skills for continuous learning in mathematics and related disciplines, and for applications to the real world. It also develops the necessary process skills for the acquisition and application of mathematical concepts and skills

Principles of Accounts

The syllabus aims to develop a better understanding of the principles and concepts of accounting and their applications in a variety of business situations. Candidates will acquire more knowledge in double entry and develop the ability to prepare, present, analyse and interpret financial statements.

Geography

This subject comprises of Physical Geography, Human Geography and geographical skills and techniques. The physical geography topics are Plate Tectonics and Resulting Landforms, Weather and Climate, Natural Vegetation and Rivers and Coasts. The human geography topics are Geography of Food, The Industrial World, Tourism and Development

History

This subject aims to simulate interest in and enthusiasm for the study of the past. It is also to promote the acquisition of knowledge and understanding of human activity in the past, linking it as appropriate, with the present. By understanding the development of social and cultural values, it promotes the learning of basic historical concepts, such as cause and consequence, continuity and change.

Combine Humanities (Social Studies, Geography/History)

Social Studies- The proposed syllabus is organised around two core ideas – "Being Rooted" and "Living Global". Through these two ideas, the syllabus aims to develop our candidates into well informed, responsible citizens with a sense of national identity and a global perspective

Geography Elective- Comprises Physical Geography, Human Geography and geographical skills and techniques. The physical geography topics are Natural Vegetation and Rivers and Coasts. The human geography topics are Geography of Food and Development

History Elective- The History syllabus has been revised to provide candidates with a global perspective of the complexities of international relations. It highlights the importance of understanding and interpreting history in all its complexity – its people, events, issues, periods, turning points, themes and sources. The syllabus also equips candidates with the necessary skills to make reasoned and informed decisions
