### **Business and Management in Hospitality Industry**

This Module covers the nature, principles and concepts of business and management in the context of hospitality and F&B industry. Learners shall learn the roles of Government and stake-holders of business, and their relationship with the larger community and society. Learners shall also learn the concept of competitive advantage, and the key success factors, and inherent challenge of business, including the organizational structure and roles, management regulations and practices.

### **Food and Beverage Operation and Development**

In this module, learners will be taught on technique to of the operational and supervisory aspects of running a food and beverage operation for a range of hospitality and leisure organizations and clients. Learners will appreciate the factors involved in meeting customer needs and also be able to produce an outline plan for specific food and beverage operations.

### **Customer care and Experience**

In this module, learner shall learn the importance of quality system and culture for customer service. The learners are also taught on the skills to engage the customers and establish customer needs and provide the appropriate service and how to deal with customer complaints.

### **Room Division Operations**

In this unit, the learners shall learn the room division operations in context of hospitality and hotel operation comprising front office and housekeeping departments. The scope includes organization and supervisory roles for the entire process of room operations from reservation, front office services, housekeeping operation to billing for a holistic customer experience.

### **Finance in the Hospitality Industry**

In this module, learners are taught on the overview of financial management, basic accounting system, menu planning and kitchen accounting, students will learn managerial, business and operational decisions based on a thorough understanding of financial analyses and techniques for future business activities

### **Work Experience (Industrial Attachment)**

The Industrial Attachment is a short-term work experience for students to have an opportunity to put into practice their skills which they have acquired into the real world workplace. This allows students to gain valuable real life experience while working under the supervision of a full time employee thus learning a variety of skills. A variety of skills that can be applied may include teamwork, analytical skills, knowledge & competency acquired during their study.

### **Choose one of the following modules:**

#### **Gastronomy / Pastry Studies**

The unit addresses essential academic and organoleptic skills, together with an appreciation of how such skills can be applied to contemporary gastronomy. Initially learners develop an overview of gastronomy, which leads to an investigation of gastronomic trends. The content is flexible, enabling learners to respond to trends as they develop and to anticipate where they may lead in the future.

Learners will use their skills and knowledge to prepare and evaluate the acceptability and quality of products prepared. This unit will also develop learners' knowledge and skills in the creative preparation of patisserie goods. Learners will also be able to apply creative flair in the preparation of patisserie dishes.

#### **Entrepreneurship**

Entrepreneurship is about taking calculated risks and initiative to drive a business or an idea to generate revenue while attempts to make profits. In this module, student will be taught to oversee the setup of an enterprise including using business tools and models to help monitor and identify potential growth in different sectors. Often started off as a small business any enterprise must have the proper vision, mission, and value including organisational skills to help deliver it effectively
